DETAILS ARE THE DIFFERENCE BETWEEN ORDINARY AND EXCELLENCE

Weir Concepts At Work For You

RACK AND PINION ACTUATORS

Weir Concepts WC-R Range rack and pinion actuator satisfies a wide range of industrial and process applications.

They feature a durable, compact twin rack design and come pre-lubricated for the life of the assembly at least one million cycles under normal working conditions.

- Wide range of economical sizing and selections.
- The materials used in construction and assembly provide superior corrosion protection.
- Temperature range -40 to 80°C .
- SAFE and VERSATILE - spring return units can be assembled to provide spring return operation in either clockwise or counter-clockwise directions.
- Long end cap screws retain the cap until the spring is relaxed, providing safe disassembly.
- Every WC Fluid System actuator is built to provide long and efficient service with minimum maintenance.
- The design, engineering and materials used in the construction ensure optimum performance even in the harshest environments.
- Each unit is fully tested upon manufacture.
- Max air supply: 140PSI
- Extruded aluminium body for internal and external corrosion protection. Honed cylinder surface for longer life and low coefficient of friction.

WEIR CONCEPTS OFFERS TECHNICAL CONSULTING AND PROVIDES A TOTAL END TO END SOLUTION.

- Dual piston rack and pinion design for compact construction, symmetric mounting position, high-cycle life and fast operation. Reverse rotation can be accomplished in the field by simply inverting the pistons.
- Multiple bearings and guides on racks and pistons, low friction, high cycle life.
- Modular preloaded spring cartridge design, with coated spring for versatile range, greater safety corrosion resistance, and longer cycle life.
- Fully machined teeth on piston and pinion for accurate low backlash rack and pinion engagement for maximum efficiency. Stainless steel fasteners for long term corrosion resistance.
- Full conformance to the latest specifications: ISO5211, DIN 3337 and NAMUR for industry standard mounting of solenoids, limit switches and other accessories.

No.	Description	QTY	Standard Materials
1	Indicator Screw	1	Stainless Steel
2	Indicator Screw	1	Plastic
3	Snap Ring	1	Stainless Steel
4	Washer	1	Stainless Steel
5	Outside Washer	1	Engineering Plastics
6	Body	1	Aluminum Alloy
7	O-Ring (Top)	1	Viton / NBR
8	Bearing Wear Band	1	Engineering Plastics
9	Inside Washer	1	Engineering Plastics
10	Pinion	1	Alloy Steel
11	Wear Band Bottom	1	Engineering Plastics
12	O-Ring (Bottom)	1	Viton / NBR
13	Plug	2	NBR
14	Piston	2	Die-casting Aluminum/Steel
15	Piston O-Ring	2	Viton / NBR
16	Piston Wear Band	2	Die-casting Aluminum/Steel
17	Guide Piston	2	Nylon 66
18	Spring	-	Spring Steel
19	Spring Retainer (L)	-	Nylon 66
20	Spring Retainer (R)	-	Nylon 66
21	Retainer Connector	-	Brass
22	End-Cap O-Ring	2	Viton / NBR
23	End-Cap	2	Die-casting Aluminum
24	End-Cap Stop Screw	8	Stainless Steel
25	Adjust Screw	2	Stainless Steel
26	Adjust Screw Nut	2	Stainless Steel
27	Adjust Screw Washer	2	Stainless Steel
28	Adjust Screw O-Ring	2	Viton / NBR

PARTS AND MATERIAL TABLE

OPERATING PRINCIPLE AND STANDARD ROTATION

A B
CCW

CCW - Air to Port pushes pistons out, turning the pinion counterclockwise as air is expelled from Port B.

A B
CW

CCW - Air to Port A pushes pistons out, compressing springs. The pinion turns counterclockwise as air is expelled from Port B.

A B
CW

DA - Air to Port B pulls pistons inward, turning the pinion clockwise as air is expelled from Port A.

A B
CCW

CW - With loss of air pressure, stored energy in the springs drives pistons inward, turning the pinion clockwise as air is released from Port A.

OUTPUT TORQUE OF DOUBLE ACTING ACTUATORS

Output Torque of WC Series Pneumatic Actuator w/ Double Acting (Unit: lbs.)
